Missouri School of Mines and Metallurgy

The MISSOURI MINER

NUMBER 1

VOLUME 46

ROLLA, MO., FRIDAY, SEPT. 18, 1959

Prof. Hershkowitz Named Assistant Dean of Faculty

Leon Hershkowitz '41, Professor of Civil Engineering at M. S. M., has been named Assistant Dean of the Faculty at the Missouri School of Mines and Metallurgy, replacing Vernon A. C. Gevecker, who will return to the Civil Department as a teacher.

The appointment is effective September 1, 1959. Hershkowitz received his Bachelor and Master of Science Degrees in Civil Engineering from M. S. M. He received his first degree in 1941 and his second one in 1948. He also received his professional degree of Civil Engineering in 1949 for the school.

Born in Iola, Kansas, on November 13, 1903, Hershkowitz has been Professor of Civil Engineering at M. S. M. since 1957, and has been on the teaching staff since 1945.

From 1926 to 1939 he had considerable practical experience with the Frisco Railroad and the Illi-

nois Highway Department, and from 1941 to 1946 he served as an officer in the U. S. Army Corps of Engineers. He retired from the U. S. Army Reserve in November 1958 as a Lieutenant Colonel after 33 years of commissioned service.

Along with his teaching schedule Professor Hershkowitz has served on many faculty committees and for a number of years he has been chairman of the Commencement Committee. He is the immediate past president of the Mid-Missouri Section—American Society of Civil Engineers. Since 1953, he has been the Secretary-Treasurer of the Missouri School of Mines Alumni Association and at present he is chairman of the Rolla U. S. O.

Professor Gevecker, who is returning to the Civil Department, joined the staff at M. S. M. in 1938.

Summer ROTC Program Continues During Summer

by Jerry Catron

Although the band was silent and the sound of marching feet was reduced to a whisper, the Military Department still continued its training of officers throughout the summer. While the regular cadets sweated and strained at summer camp, six sophomores and five juniors kept the military classrooms alive on the campus. These 11 cadets, being in the co-op program, made it necessary to run a special session in order to keep them abreast of their classmates. In many respects, they were the lucky ones. Being small

in number, they derived the benefits of greater class participation plus more personal attention from the instructors. Thus, it was a most successful program.

On the first of August, during the graduation exercises, four of the regular cadets received their commissions as 2nd Lieutenants in the Corps of Engineers. They were: Perry Ross Allison, Richard E. Beisner, Gary B. Chullino, and Phillip R. Johnson. Colonel Lloyd L. Rall delivered their oath of office and President Elmer Ellis presented them with their commissions.

On 31 July, at Fort Leonard (Continued on Page 5)

Miners to Face Lincoln University Saturday in First Game of Season

Tomorrow, September 19, the Miners will be host to the Lincoln University grid squad. Considered as one of the best small college teams because of their size and strength, the Lincoln eleven consistently plays a hard and highly skilled game. Last year Lincoln defeated Warrensburg 45-0 and the Miners 46-0.

Lincoln opened their football season on Labor Day with Augustina College of Sioux Falls, S. D. Lincoln, although they practiced only one week previous to the game (three times daily), defeated Sioux Falls 36-14. This indicates that they will approximately be as good a team as previously.

The scout report from the Lincoln-Augustina game was unable to produce a lineup for Lincoln as there was no brochure published. Thus the Lincoln squad is something of a mystery. Both of the Lincoln quarterbacks proved to

be good throwers and frequently attempted long passes, which promises to make tomorrow's game exciting. Their best receiver is No. 10, but his position and name are unknown because he was moved to various positions. All of the Lincoln receivers were reported to have more than average speed.

The scout thought that Lincoln's two ends, Adams and Hefner, a fine pair of runners, made the difference in the Sioux Falls game. The scout also noticed that an end, Hooper, played a fast and heads-up brand of football.

Although the information about Lincoln University's team is sketchy, more is known about them than last year, which improves the Miners' chances. Lincoln's coach is known to practice unorthodox training methods. One of them is the training of both

of his first teams to play either offense or defense. This results in a versatile squad which is easily shuffled around in case of injuries, but does not provide for matches against teams which have specialized squads of both offense and defense. Lincoln has about 21 returning lettermen.

Whereas the Miners usually run variations of the "T" formation, Lincoln used an unbalanced line against Sioux Falls. The Miners' strength relies on their throwing, but they can be expected to run quite a few plays also. The Miners have about the same team as last year with the exception of three new players which Coach Bullman claims are quite an improvement.

All in all, the game tomorrow promises to be an omen of things to come and it will be interesting to see the outcome. See you at the game when the Miners try to reverse the shutout of last year!

First row, left to right: John Sullivan, Jim Kamicar, Eldon Finley, Dean Moss, Bill Wheeler, Pat O'Mealy, Tom Cooper, Louis Meisenheimer, Bob Rose, Joe Gay, Charles McCaw, Craig Meier, James Marble.

Second row, l. to r.: Robert Pettibon, Homer Boswell, Glenn Usher, Paul Wiegard, James Verdi, Jerome Rhineberger, Bob Smith, John Farmer, Ted Deranja.

Third row, l. to r.: Pat Dunivin, Kenneth Cage, Robert Tooke, Charles McGrady, Russell Hayes, Patrick Skow, Robert Gollhofer, John Berry, Don Sidwell.

Fourth row, l. to r.: Arnold Apprill, Allen Early, Jerry Scoggins, Ron Avery, Morris Boren, Henry Peterson, Bob Booth, Mike Hillmeyer.

Fifth row, l. to r.: Charley Riggs, Bob Reininger, Bob Howard, Mike Sullivan, Charley Ware, Robert Olson, Larry Stringer, Milton Mantler, Arnold Hill, Dalton Welsh, Gary Couse.

NOTICES

Tickets for the Miner-Washington University football game Saturday, Sept. 26, have arrived and are available at the Business Office.

Any students interested in

the Cooperative Training Program should register with Prof. C. W. Grate, Room 202, Mechanical Building. Students presently enrolled as Co-op students should also check with Prof. Grate.

Due to increased enrollment, exact figures on the number of students attending classes during the fall semester of 1959 were not available in time for the first printing of the Missouri Miner.

It is known that there are more students registered than for any previous semester. The exact figures, with a breakdown by departments will be in next week's Miner.

THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

The subscription is \$1.00 per semester. This Missouri Miner features activities of the Students and Faculty of M.S.M.

EDITORIALS

Well, they've done it again. They've managed to change all of the Freshman textbooks except one, and it has been all of one year since the last big change.

You say you had to spend sixty dollars for books this semester, why that's ridiculous. Ridiculous because he had spent such a large sum of money for just one semester's books. Not only that, but his friends who had taken the same courses were stuck with expensive books because they were not using the same text as had previously been used. Come next semester, a good portion of his sixty dollars worth of books will be obsolete and he likewise will be left with a good start on a reference library.

So goes the story and the money of a typical Miner. This typical Miner does not fully understand why he had to buy a new textbook for eight dollars when the book that was used beforehand for so many years was so well liked. Especially when he tries to study from the new book and finds it much more convenient and possibly necessary to use the old book for reference. The clincher comes when midway through the course, after many complaints from the class, the teacher admits that the new book is not a good one at all, but he will remedy the situation by finding a new one for the next semester.

This changing of books quite often is becoming rather commonplace around MSM, and as luck would have it, the books that are changed just happen to be of the more expensive type.

Now who profits by this change of books? Does the student profit by greater knowledge because it is a better book or learn from? Does the student who is stuck with the old book gain anything by keeping it? Or is all the profit shown on the ledgers of the merchants who sell the books? Well, we can safely say that the only party to profit in every case is the local booksellers.

That is a mounting gripe of the students, and a very legitimate one at that. No one would mind the added expense if he stood a good chance of deriving some benefit from it, but it appears as if a teacher just decides on a new book at random when he is unsatisfied with the old book, and trusts to luck that it will be some improvement.

If the teachers would change the book only after first spending some time and thought deciding on which would be the best book for the course, then the necessity of changing so often would be eliminated.

Dizzy's Corner

Chortle, yuk. Boy, were the freshmen bulldozed into something this last week.

Cool-type Move Number One:

The various departments on campus have changed all the freshman books except for the math text. My, my, such concern for the scholastic level of the frosh. The only people who seem over-joyed about the change are the book-store-type beings, instructors are moaning about the change in their lecture schedule (which haven't been added to or changed since they've been at M. S. M.), sophomores are stuck with some rather weighty but quite useless collections of freshman knowledge, and the frosh's pocket-book is groaning beneath the increase. The shadier element on campus, namely Bash and Mox-U-Sick, have already cashed in on the situation. They're selling slightly sweat-stained copies of Markman and Smith Chem. books on the black market. (Cheaper if you want their personal autograph.)

"Welcome Freshman," cry all the town slop-chutes and clip joints. Touching, isn't it. Two weeks from now when they'll become bona fide Miners, they'll be referred to as those impetuous freshmen. To the natives in these parts we're a necessary evil: necessary in the sense that we supply a goodly portion of the good green stuff for the fair flower of Phelps County. Figure it out sometime: If the average student spends six hundred bucks in Rolla-type stores all year and there are three thousand of us—where's the slide rule.

Deans may come and deans may go, but the pep talk in the Uptown Theatre never manages to disappear or change. As far back as memory goes the dramatic line, "The guy next to you won't be here next semester," has been used. It never changes.

Cool-type Move Number Two

The board of trustees (chaps who haven't hit the guards, incited riots over the food, not at-

tempted a break, etc.) have increased the dorm contract from one semester to a year. Helsie Stump, a spokesman for the group explained that due to increased cost of managing the dormitories it has been necessary to make the dorm contract one year. Mr. Stump failed to define "increased cost." The food is its same old indigestible self, the noise level has increased ten decibels, and the grade point lowered. A nasty rumor precipitated the movement, is it really true that one whole dorm was emptied second semester last year?

Hats off! A land mark on the M. S. M. campus won't be with us this year. The man in the blue flannel tent, Rockin' Robbins, is not going to lead his talented group. Wiggle, Giggles. Fear not, my war correspondents inform me that the ever present plaintive squeal of the band shall still be with us (under the cudgel of a militarist, yet.) Wrrll's Rabble will march (march?) again!

Sequel to Last Semester's Battles

A serious charge was brought against two of our more prominent local citizens. Flash (Sig Ep) and King (TKE) have been tried by courts martial for:

- 1) Brawling in ranks.
- 2) Being out of uniform.
- 3) Disturbing the peace.
- 4) Having conduct unbecoming a dog-type soldier.

(Note: The above terrible pun was borrowed from the miserable scratchings of B. & M. N.—I refuse to claim authorship.)

They were sentenced to life in Rolla, Mo. A cruel and unjust punishment in my opinion.

All members of T. G. I. F. are cordially invited to attend the first meeting this afternoon. The executive counsel has been meeting regularly for the last two weeks.

Remember, make every week, "I hate Bax and Mox Nix," week.

Good news: Only 179 days to St. Pat's. Cha-Cha-Cha. Burp!

Cheery-Bye,
Dizzy.

Liquor Law Crackdown

COLUMBIA, Mo., Sept. 17.—How the new state liquor law prohibiting the possession of liquor by minors will "put teeth in liquor control enforcement," will be discussed on the first fall Missouri Forum program at 5:30 p. m., Sept. 20, on University of Missouri Station KOMU-TV, Channel 8.

Hollis M. Ketchum, supervisor of the State Liquor Control Department, will interpret the law and its enforcement. He will be interviewed by Bob Debo, Jefferson City correspondent for United Press International; Jack Simmon, political writer, Jefferson City; and Jim Walsh, newscaster, KCMO-TV, Kansas City.

Dr. Edward C. Lambert, assistant to the president in charge of television and professor in journalism, will make his first appearance as moderator for the fall series, with its new time, 5:30 p. m. on Sundays. Dr. Bart Griffith, assistant professor of speech and dramatic art, who has produced and moderated the Forum for the past two years, will continue through the fall as co-producer.

The supervisor of the Liquor Control Department, created in 1934, has exclusive power to is-

sue, revoke or suspend licenses for the local sale of intoxicating liquors and nonintoxicating beer. He also has the power to make rules and regulations governing the conduct and methods of operation of all licensees.

He and the agents of his department are assisted in the enforcement of the Liquor Control Law and the Nonintoxicating Beer Law by prosecuting attorneys, sheriffs, their deputies, and police officers. For enforcement purposes, the State is divided into six districts.

Essentially, the new law provides that any person under 21 who purchases or attempts to purchase or has in his possession any intoxicating liquor (including 5 per cent beer) is guilty of a misdemeanor. In addition, any minor purchasing or attempting to purchase nonintoxicating beer is guilty of a misdemeanor. Conviction of a misdemeanor carries a maximum punishment of a year in jail, a \$1,000 fine, or both.

Missouri Forum will not be seen on Sept. 27, because of network coverage of the visit of Nikita S. Krushchev, premier of the U. S. S. R. A special Forum program on September 29 will feature area leaders in State Adult Education.

Delta Sigs Have Vision; See Rolla as Paradise

Here we are back in that "Vacation Paradise in the Missouri Ozarks" (Courtesy Rolla Chamber of Commerce). There doesn't seem to be much of a change in the town—it still looks like Death Valley. I did notice that some of the trenches on campus have been filled in. It is now possible to cross the campus in comparative safety.

Most everyone has returned now; the house is filled. Best wishes to several brothers who exchanged their freedom for a wife. They were: Mr. and Mrs. Gerald Hargis, Mr. and Mrs. Bob Harris, and Mr. and Mrs. Carol Robinson.

Delta Sig has a large pledge class this semester. We would like to take this opportunity to wel-

come these pledges, upon whom the future of the chapter may some day depend.

The summer has seen many major improvements. The chapter room has been completely refurnished, with a vast improvement in appearance. The Nile House has been entirely redone, with new siding outside, and new paint inside.

A sincere welcome to Mildred, Alice's new assistant. She appears to be a strong assurance that Delta Sig will continue to serve the best food on campus.

Take warning—watch out for the footballers. As much as these monsters eat, they should be terrors on the gridiron. Seriously, we have the nucleus of a strong team and should cause quite a little trouble around the league.

Miners Face Tough Opponents As Season Gets Under Way

As the opening game draws near, the Miner ball club is quickly rounding into shape. Prospects are fairly good for the year as the Miners have the nucleus of last year's strong ball club back again.

The Miners have a tough schedule with Lincoln University, Washington University, and Kansas State Teachers College as the opponents before the league begins. In the league, Coach Bullman figures the club ought to stand up well with the main tormentors being Cape Girardeau and possibly a surprising Springfield ball club.

The starting team for the Miners will be Dub Wheeler at quarterback; Tom Cooper and Pat O'Mealy at halfback and Ted Deranja at fullback. Mike Hillmeyer will be the Miners' center, flanked on both sides by Jim Marble and Joe Gay at guard and Lou Meisenheimer and Chuck McCaw at tackle. The ends will be Ken Cage and Jerry Scoggins.

The defensive platoon consists of Ron Avery at center with Bob Booth and John Sullivan at ends, Craig Meier and Allen Early at guards, Dean Moss and Charles McCaw at tackles; Chick Boren and Jim Kamicar will be at halfbacks, while Paul Wiegard and Jerome Rhineberger will be the fullbacks.

Gale is going with a similar offense he used in last year's fine season. Spreads will be used on both sides to help amplify the passing attack which is fairly strong. The defense which was tough in the past will be used and it should be a good consistent combination.

The main hopes of the team depend on the passing of Dub Wheeler and the pass receiving of Cooper, O'Mealy, Deranja, Cage and Scoggins. Wheeler was first in the conference in pass competing with 85 completed out of 155 attempted for a percentage of 55. This also ranked Dub fourth in small colleges in the nation.

Tom Cooper, an outstanding ballplayer both on offense and defense, caught 30 passes for 435 yards while averaging 6.13 yards per carry on the ground. O'Mealy and Deranja are good all around ball players to round out the Miner backfield.

The place kicking this season will be done by Pat O'Mealy and the punting by Charley McCaw, who, like many of the Miners, are playing both offense and defense.

Looking at the statistics, the Miners could really be a tough contender but we'll know in a week when the facts are laid on the field as Lincoln U. takes on the Miners here at Jackling Field.

MSM Enters 59-60 Gridiron Season With a Substantial Group of Returning Lettermen Subordinated by Talented, Eager Sophomores

Brief Rundown of Miner Football Battery Suggests Strong Possibilities of Undefeated Season

Joint Captainship of Cooper and Meisenheimer to Spearhead Miners' Strong Defense

With the fall season just around the corner, football fever again sweeps the nation. The Miners are preparing for their first fracas of the year when they meet Lincoln U., this Saturday, beginning at 2:30 p. m.

INDIVIDUAL PLAYER SKETCHES

EVERY, RON: This is Ron's third year with the Miners, at center. He is a starter on the defensive team. Ron is one of the finest defensive players. His major is civil engineering.

BERRY, JOHN: Tackle, has improved a great deal over his freshman year and should see a great deal of action this year. John's major is mechanical engineering.

BOOTH, ROBERT: This is Robert's fourth year with the Miners. He plays both offensive and defensive, and has a good chance to make all-conference. Metallurgy is Robert's major.

BORN, MORRIS: This will be Boren's third year on the Miner squad. He dropped out a year

ago and did not play in 1958. He is one of the fastest men on the squad. Morris' major is mechanical engineering.

BOSWELL, HOMER: Homer played at Cape Girardeau Central High School. The smallest back in the conference. Two years on the squad, will be used on both offense and defense. He is majoring in petroleum.

CAGE, KENNETH: Two years in football at M. S. M., and from early practice indications he should become a good defensive player. He has average speed and is a good pass receiver. His major is mechanical engineering.

COOPER, TOM: Tom is Co-Captain. This will be his fourth year on the Miner team. He was an all-conference half-back in 1958, was among the first ten in pass receiving, and yards gained of small colleges in the nation. He is in excellent condition, and should be one of the greatest backs in Miner history.

DERANJA, TED: This is Ted's second year on the Miner team, at full back. In 1958 he played on the first defensive team as a corner man, and served as an understudy to Ray Parker at offensive full-back. He is from St. Louis, Roosevelt High School.

He should be the regular offensive fullback in 1959. Electrical engineering is Ted's major.

DUNIVIN, PAT: Pat reported for football for a short time in 1958, but did not play in any games. He is back on the squad this year, and is trying out at tackle. With more experience, he should see some action this year. He is from Willow Springs, Mo. Pat is majoring in civil engineering.

EARLY, ALLEN: Allen is from Alton, Ill. On the 1958 team he started as an end. He was moved to guard where he played enough to make a letter. On the '59 team he should be a starter on the defensive as a guard; he may also be used at defensive end, and is sure to see plenty of action. Allen's major is chemical engineering.

FARMER, JOHN: Comes from Russell, Kan. This is his second year at quarterback. His freshman year he was fourth string quarterback, and this year he is moved up to second string quar-

terback where he will see plenty of action. John is majoring in petroleum.

FINLEY, ELDON: This is Finley's third year on the team as a center. He plays both offense and defense. Eldon won a letter his sophomore year. His home is in Springfield, Mo. Eldon, a G. I., is one of the three leading candidates for the center position. His major is mechanical engineering.

GAY, JOE: This is Joe's third year on the Miner team where he has played both tackle and guard. He also plays both offense and defense. This year he will be playing in the guard position, and he should easily be one of the best guards for his junior year that the Miners have ever had. Joe is also a member of the Miners' track team where he is expected to break the Miner record on the disc team. Joe is majoring in chemical engineering.

GOLLHOFER, ROBERT: This is Robert's second year on the Miner team where he is a strong candidate for the guard position. He did not play high school football. Bob was a member of the Miner golf team in the spring of 1959. He lives near Chicago, Ill. Robert's major is chemical engineering.

HAYES, RUSSELL: Russell is a second semester freshman. He has not played football here before. At the present time he has been trying at both guard and end, and he is a very good candidate for either position. His home is at Hayden, Mo. Civil engineering is Russell's major.

HILLMEYER, MICHAEL: This will be Mike's third year as a center. He played regular offensive center on the '58 team and was outstanding in the conference play, especially as a blocker. He should become as good an offensive player as the Miners have had in the last 20 years. Mike is from Webster Groves, Mo. He is majoring in mechanical engineering.

KAMICAR, JAMES: This will be James' third year on the squad at fullback. He will play mostly on the offensive team. Handicapped by an early season injury he was kept out of six games in 1958, and he is getting a late start with the 1959 team. He is one of the leading candidates at left halfback, at both offense and defense. James is majoring in civil engineering.

MARBLE, JAMES: Jim is one of the most outstanding linemen that the Miners have had in 20 years. An injury early in the '58 season kept him out of the last seven games. He is back again this year, and should be a good linesman on the Miner squad. Jim is majoring in petroleum.

MCCAW, CHARLES: Junior, no doubt will hold down a tackle position on both offense and defense. He will do the punting for the Miners this year. Charles played high school football at Rolla High School. He is majoring in mechanical engineering.

MCGRADY, CHARLES: G. I., 23 years old. This is his second year. With very little football experience and no competition, he is a strong contender for the center position. He can play either offense or defense. He is from Washington, D. C. His major is geology.

MEIER, CRAIG: One of the smaller guards on the team. He was especially good as a line-backer in 1958. This is his third year, and from early practice indications he should have a great season. His father played football for Coach Bullman at Washington University about 25 years ago. Craig is majoring in electrical engineering.

MEISENHEIMER, LOUIS: Louis is co-captain of the team for 1959. He was picked as an all-conference tackle in the 1958 season. He should be one of the outstanding linemen in this state this year. Louis also doubles as a pass receiver from the tackle position in the Miner offense. Louis is a transfer from Southeast Missouri State, Cape Girardeau, Mo., which is his home town. He is majoring in petroleum.

MOSS, DEAN: This is Dean's third year on the Miner team as a tackle. He is the largest man on the squad with a weight of 225 and height of 6'6". In the past

he has been used more on the defense but this year he will probably see some action on the offense. His major is electrical engineering.

O'MEALY, PAT: Pat is a junior. Starting his third year with the Miner football team he is one of the faster backs, and is an excellent pass receiver, also a number one place kicker. He had a great season in 1958 and should have a better one in 1959. The Miners expect his field goal kicking to help them in close games. He is majoring in civil engineering.

PETERSON, HENRY: Henry played high school football at Plano, Ill. This is his third year on the Miner team where he has been at full-back and at both left and right halfback. In the 1958 season he played mostly on the defense team. This year he is expected to play both offense and defense. He is majoring in electrical engineering.

PETTIBON, ROBERT: Robert reported for football for the

first time last year. He is one of the few first year men to make a letter. This year he has been moved up to a starter position, and great things are expected of him. He is majoring in civil engineering.

RHINEBERGER, JERRY: Jerry is from Festus, Mo., where he was an outstanding fullback on the high school team. He is one of the bigger backs and has shown considerable running power in early season work. Jerry is majoring in mechanical engineering.

SCOGGINS, JERRY: He had some high school experience as an end. He did not report for football here in 1958, but started this fall. We know little about his ability, but if early practice is any indication, he should become one of the team's outstanding ends. He is fast and one of the team's better receivers. Jerry's major is civil engineering.

SIDWELL, DON: Don is from Rolla High School, where he was an outstanding end. Since freshmen see very little action, he did not play much his freshman year. Don is one of the bigger ends and should see plenty of ac-

tion, especially on defense. His major is civil engineering.

SKOW, PATRICK: This is Skow's second year on the team. With very little experience he came out his junior year, and received an ankle injury which kept him out of practically the entire '58 season. He is looking good early practice and should play a good deal of football this year. Pat is majoring in metallurgy.

SMITH, ROBERT: This is Bob's second year on the Miner squad. He played end for the Jefferson City High School before coming here. He is one of the smaller ends and will be used mostly on offense as a pass receiver. He is majoring in physics.

SULLIVAN, JOHN: This is John's fourth year as an end on the Miner squad. He will be the team's number two punter, and very valuable as a pass receiver. He will be a starter on either defense or offense, and will probably work his way the entire season. John is majoring in metallurgy.

VERDI, JAMES: This will be Jim's second year on the Miner team. He played high school football at Waukegan, Ill. Last year he was used entirely as a defensive back. At the present time he will be used as an under study to right halfback, and a defensive corner man. James is majoring in metallurgy.

WHEELER, BILL: This is Dub's fourth year on the Miner team as a quarterback. Last season he was ranked fourth among the nation's small colleges for passes completed and yards gained. He is easily one of the outstanding quarterbacks that the Miners have ever had. He is also a great signal caller. Bill's major is electrical engineering.

ROSE, BOB: This is Bob's third year on the team. He plays mostly on defense last year, and will be used at defensive guard this year. He is one of the best punters on the squad. His major is metallurgy.

TOOKE, ROBERT: Robert's second year on the team. He is big and should play both offense and defense this season. He plays

Pat O'Mealy, Tom Cooper, Morris Boren

Louis Meisenheimer, Allen Early, Robert Gollhofer

Summer ROTC Training

(Continued from Page 1)

Wood, 20 seniors were sworn into the Army as Corps of Engineers Officers. They were: Donnell W. Agers, Robert J. Ahlert, William D. Auberry, Robert J. Baker, Lloyd G. Gabbert, Robert E. Ganninger, Kenneth J. Howard, James D. Jackson, Neal L. Lawson, Kenneth R. Lindsey, Clarence D. Matlock, Alan H. McHugh, Jan H. Paynton, Arthur R. Ryter, Galyon G. Smith, Herman C. Smith, Gerald L. Stevenson, Richard L. Thompson, Walter D. Tims and Harry E. West, Jr. There were cadets who had already completed their military and academic requirements for a commission, as well as a degree, but had not previously been to summer camp. Thus, it was that at the close of the ROTC camp, they received both a degree and a commission during the final camp ceremonies. Besides the ones who were commissioned, there were 85 cadets who completed their summer camp training but who will be back in school this fall.

Simultaneously, four more cadets were taking their oath of office at the ROTC camp at Fort Belvoir, Virginia. They were: Rex A. Gilmore, Jr., William H. Love, Donald R. Parille and Robert G. Rodenburg. They were commissioned during the closing ceremonies at camp. With them but not commissioned were 10 other cadets who completed their summer training but will graduate at a later date.

Ten more cadets received summer camp training at Fort Gordon, Georgia, which is the Signal Corps Training Center. Of these, Albert W. Weinrich was commissioned a 2nd Lieutenant in the Army Signal Corps.

At Fort Lee, Virginia, four cadets were trained at the Transportation Corps camp.

Two cadets went to Fort Riley, Kansas, for summer camp, one of which, Thomas J. Meyer, received his commission in the Chemical Corps.

Thus it was, that although the Military Department was relatively quiet on the campus, their cadets were most active throughout various parts of the country. MSM was represented in four different states at six different installations.

On the 27th of June, the staff of the Military Department served as hosts for the Army when the Army represented the "Outstanding Public Service Award" to radio station KTTR in Rolla. Colonel Lloyd L. Rall served as

senior spokesman and presented the award to Mr. Luther Martin. Representatives of other Army units in the Rolla area participated in the ceremony and stood by at the presentation.

The Military Department has, for several years, been the largest Engineer ROTC unit in the Unit-

ed States. The indications are that it will continue to be and is certainly a year-around operation. The staff not only provides instruction for students during all school sessions, but goes out with the cadets to the various camps each summer to supervise their field training.

ed high school ball at Cape Girardeau. Robert will be used mostly at guard. He is majoring in metallurgy.

APPRILL, ARNOLD: Freshman line backer with very little experience, from St. Louis, Mo. He is majoring in civil engineering.

HILL, ARNOLD: Best Freshman prospect here. He is the fastest man on the squad. Quarterback and may see some action this year. He is from Union, Mo. Arnold is majoring in physics.

HOWARD, BOB: Freshman from Bethalto, Ill. Plays offense and defense. Was on All-Area Team in his senior year. Bob is majoring in mechanical engineering. His brother, Ken, finished here last spring.

Fastest to Learn, Fastest to Use! That's the famous K&E Decitrig® scale system — preferred by engineers and featured by both these K&E Slide Rules. This system gives you all the scales you'll need . . . arranged without troublesome complications. It never contradicts itself . . . every scale relates — consistently — to the basic C and D scales. Numbers are color-coded for easy reading in both directions: black reads left to right, red reads right to left.

Efficient . . . Versatile — With the K&E Decitrig scale system you can find square-root values quickly, without stopping to reset. There's no confusion — direct functions always appear on like colors, co-functions on opposite colors. Get the benefits of these clear, simple, efficient scales on either of the two K&E Decitrig Slide Rules — the K&E Jet-Log™ Duplex Decitrig® or the K&E Log Log Duplex Decitrig®. Both come with a lifetime guarantee.

The Jet-Log is made of handsome, durable Ivorite®, and

comes complete with a smart top-grain cowhide case and a detachable belt-loop carrier. And you'll get a manual for easy self-instruction or between-classes reference . . . a handsome library-bound book you can keep for years.

The Log Log Duplex Decitrig . . . an instrument of unquestionable quality. It's made of choicest mahogany — ruthlessly selected, seasoned for years. Its graduations are engine-divided — deeply, accurately engraved. The most respected slide rule made, and yours complete with chamois-lined leather case, belt-loop carrier, and library-bound instruction manual.

Get the Facts — about K&E Slide Rules, plus drawing instruments and other supplies you'll need — in these two handy K&E booklets — "Slide Rule? May I help..." and the 1959-60 K&E College Buying Guide. Both are yours, free at your college store. Pick them up today!

**COLLEGE LIFE REPRESENTATIVES
ARE CAREER LIFE INSURANCE MEN**

The College Life Insurance Company of America employs full time representatives only. Each is proud of his profession and a specialist in his field. You can rely on your College Life representative for sound advice on your life insurance needs.

Just as you would not call on a part time doctor to cure your ills—you are also entitled to the service of a full time specialist in helping you plan your insurance program.

Ask your representative from The College Life Insurance Company of America about your "Select Risk" rating with substantial benefits.

BEST'S—Nation's Leading Insurance Reporting Service says: "The College Life Insurance Company of America is conservatively and capably managed, has reputable backing, and has made substantial progress since organization. The results obtained by the company have been very favorable—We recommend this company."
